

# SEMIFUSE<sup>®</sup> SFRV Mains Rated PTC Fuses

Our new SFRV series PTC fuses provide re-settable short-circuit protection in mains voltage applications e.g. transformers, electric motors, lighting etc. Current ratings from 0.05 ~ 2.0A.

## Characteristics

## Agency Approvals; UL,C-UL and TÜV

## Definitions

- I<sub>hold</sub> = Hold current, maximum current PTC will pass without tripping in 23°C still air.
- I<sub>trip</sub> = Trip current, minimum current at which the PTC will trip in still air at 23°C.
- V<sub>max</sub> = Maximum voltage PTC can withstand without damage at rated current (I<sub>max</sub>)
- I<sub>max</sub> = Maximum fault current PTC can withstand without damage at rated voltage (V<sub>max</sub>)

**CAUTION:** Operating beyond the specified maximum ratings may result in device damage and cause possible arcing and flame.
