

Campini TY53 – Air sensing Adjustable Thermostat

Campini TY-53 adjustable, air-sensing thermostats provide precise air temperature control in a range of heating appliances. The large bimetal blade allows for fine temperature adjustments over 300 degrees of spindle rotation.

Standard terminal and spindle configurations are shown in the diagram, with other options available for high-volume orders.

Options (TY-53R and TY-53RT) include an anticipatory resistor or a resistor/thermistor combination to reduce temperature differential (hysteresis) to 2K.

Features:

- Rated current and voltage: 16A/250VAC
- 200k cycle-life at maximum rated load
- Snap-action control
- 90°C maximum ambient temperature
- $\pm 4K$ tolerance
- 2K to 6K Hysteresis

Operating temperature range

- Color-coded spindles indicate four temperature ranges:
 - Yellow : 6-35°C
 - White : 6-45°C
 - Brown : 6-55°C
 - Grey : 6-70°C

Applications:

- Convactor heaters
- Fan heaters
- Combination radiant heater fires
- Keep warm cabinets

Notes:

- Manufactured in accordance with 60730-2-9 standards
- Certifications:
